The map displays the proposed project route from San Diego to San Marcos. The route is shown as a solid pink line, with a dashed pink line indicating the proposed trenchless construction section. The route starts in San Diego, passes through Escondido, and ends in San Marcos. Various impacts and planning areas are highlighted along the route, including biological resource survey areas, conserved lands, pre-approved mitigation areas, and multi-habitat planning areas. The map also shows city and county boundaries, as well as existing facilities and cross-tie connector lines.
